

Remote Site Surveys

The easy way to start your upgrade

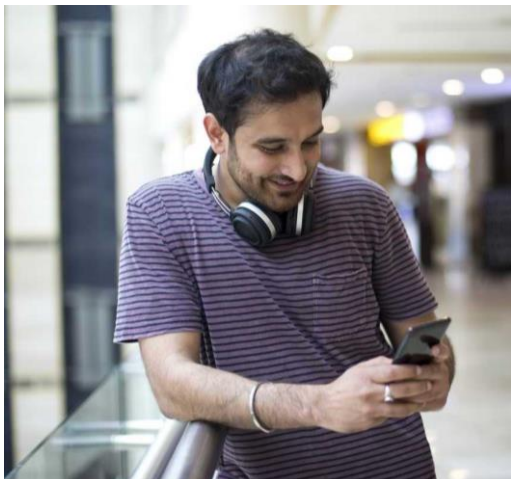

Ready to upgrade your locks but not sure where to begin? Onity can jump-start your project with a remote site survey. This new contactless approach gathers all of your lock hardware requirements without any on-site visit from our technicians. Onity offers this service at no charge and gets you on a path to upgrade quickly.

Benefits:

- Reduces planning and proposal time – get your budget numbers quickly.
- No-charge service by experienced Onity technicians – plan your upgrade with confidence.
- No need for outside physical contact – keeps your staff safe.
- Proven approach for upgrades – efficient process chosen by Onity customers.

What Onity provides:

- Experienced technician to virtually walk through your property with you.
- Guidance every step of the way during the walk-through to capture your locks and access control needs in real-time.
- Complete site survey form and materials sheet for quoting purposes.

What you need to provide:

- Site engineer or manager with access throughout the property.
- Video conferencing app such as FaceTime, Skype, or Zoom.
- Digital images taken during the walk-through from your smartphone, tablet, or laptop.
- Measurements of existing doors, access points and locks taken during the walk-through.
- A time commitment by hotel staff. An average full property survey may require approximately 4-5 hours. Larger sites and partial surveys for product additions will vary by the size and scope of the project.
