

## OnPortal Manages Onity Locks and Access Control Devices for a Property

Fully-featured and easy to use, OnPortal™ is a powerful lock management system which enhances the guest check-in process. It streamlines hotel operations by allowing your staff to easily and efficiently check in hotel guests, and manage guest stays securely.

Scalable for small to large properties, the OnPortal lock management system manages Onity hospitality locks and related equipment. OnPortal supports a range of functions from guest key production, common area access, and back of house access control for associates. The system offers a variety of access management options that match how hoteliers want to operate – physical keycards and mobile keys, front desk roving check-in and much more.

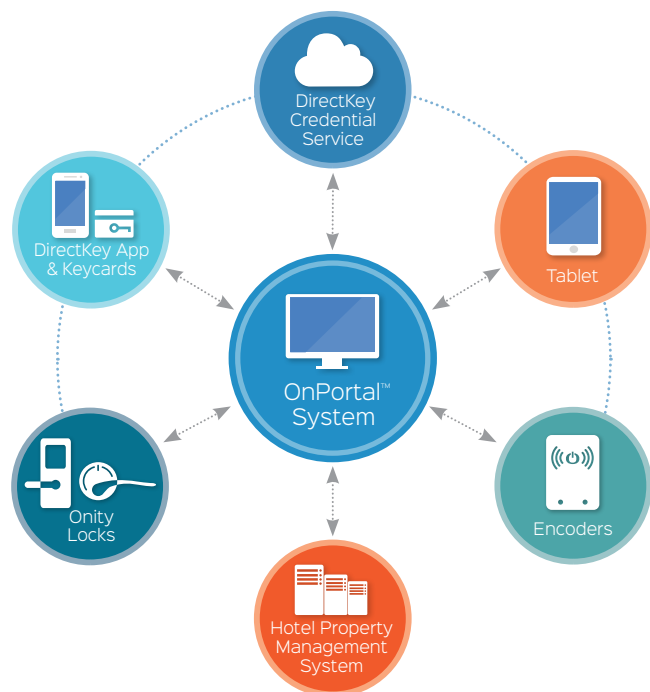

### Features

- User friendly software: easy to learn, easy to use
- Manages all Onity hospitality RFID/Bluetooth® Low Energy (BLE) locks and readers
- Scalable, designed to support small to large properties of up to 6,000 rooms
- Compatible with RFID (MIFARE® Classic/EV1, Plus or Ultralight C) technologies
- Creates and manages mobile and physical key credentials
- Multi-sector RFID encoding
- Direct interface with PMS or POS systems
- Support multiple simultaneous PMS connections
- Role-based access to the software, allowing users to perform only the required tasks
- Minimal spec tablets or PC laptops with Windows® 10 installed can be used as a Portable Programmer
- SQL Server Compact Edition platform enabled
- Compatible with remote encoding and kiosk
- Easy reporting via CSV files

### DirectKey™ Integration

OnPortal provides direct integration with Onity's DirectKey™ mobile access system which allows guests to use their smartphone as their room key. OnPortal gives independent properties access to Onity's off-the-shelf basic mobile solution, DirectKey. Ideal for properties without mobile app initiatives properties can issue DirectKey mobile credentials via the Onity DirectKey App. The software also supports Custom Integrations and Third-Party Partner Applications.
