

Introducing the OnPortal™ hardware kit, designed to deliver efficiency and flexibility for midscale, economy and independent properties.

A scalable solution with full access management.

Designed from feedback from front-desk agents on their routines and challenges, Onity's OnPortal is designed to deliver optimal efficiency, flexibility and guest satisfaction. Our new hardware kit is a plug-and-play, out-of-box system that is delivered ready to go.

Easy to set up, use and maintain.

The new hardware kit conveniently includes it all – computer, tablet and touchscreen – and comes pre-loaded with OnPortal. Scalable for multiple stations, it includes everything you need to manage your Onity lock system. The hardware kit comes with:

- A high quality mini PC, tablet, touchscreen monitor with heavy-duty stand, encoder, ethernet switch and all required cables
- Windows 10 and OnPortal pre-installed and configured
- Direct integration with Onity's DirectKey mobile access system which allows guests to use their smartphone as their room key

Remote or onsite OnPortal training is available at an additional cost.
